Sarr Buttarvo. - A English Naval Architect of some etimence, now on a visit to this country, says that the ship of the line (the Pennsylvania) nearly finished at the Navy Yard, in Philadelphia, will be the finest vessel in any navy. For beauty of model, useful and elegant proportions, strength of construction and general arrangement of the interior, he be-heves that she will be unsurpassed—certainly not equalled by any British ship. The materials worked up in her are of the choicest description, and her ornaments, although rich, will subserve utility. which we hope ever to see abroad and on the alert:

"Do you suppose the wise framers of the constitution intended to grant a power to the general government, which might cause their lair fabric to crumble in the dust; a work, in which they had endeavored so much to guard against the usurpation of powers? We then see the time must come, when consolidation must arrive, when there is to be a conflict of powers, agreeably to the latitudinarian doctrine? Who is to bend the knee, the states or the general government? Here an awful gulph, a hideous chasm, is presented to our view. Will not this latitudinarian government be responsible to you, and mankind, and the God of Nature, who has so greatly blessed you with the highest boon, for the destruction of the Ark of Liberty—(The Constitution.)—God forbid, that, that day should ever arrive! but that day has been predicted by a Henry, by the now living sages, and best patriots of the present day. Should the present doctrine, holden by the administration at Washington, go into effect, it will then become our best efforts to do our duty by ourselves, and to those who are to live, to inherat our free institutions, to stand against the present doctrine holden by the administration at Washington, go into effect, it will then become our best efforts to do our duty by ourselves, and to those who are to live, to inherat our free institutions, to stand against the present doctrine holden by the administration at Washington, go into effect, it will then become our best efforts to do our duty by ourselves, and to those who are to live, to inherat our free institutions, to stand against the present document in the administration at Washington, go into effect, it will then become our best efforts to do our duty by ourselves, and to those who are to live, to inherat our free institutions, to stand against the present down the same and the present down the present down

will be calculated to stem its force, and render it harmless."
"Why should the general government, whose arm is already so strong, so rich in resources, ever exercise doubtful powers? But here, where there can be no doubt, that the power never was intended to be given.—Why usurp? Ought not the administration at Washington to reflect, that the exercise of powers not granted, is not the the confidence, of the people of this happy land? Ought they not to know, that they are a people jealous of their rights, loving their liberty and their constitution, and hating only those who revere not the constitution, and lating only those who revere not the constitution, and love not the liberty the result thereof."

For Coughs and Consumptions.

Fig. Resummons rives has ANDERSON's COUGH.

I DROPS and PECTORAL POWDERS are well known to peace of the tense of Cable, Coughs, and other affections of the hereaft and lungs leading to Consumptions, is unjeciently peaced from the fact that they have now been in use for seven years, and that the demand for them is util rapidly increasing. Industrials have falperienced the happy effects of this Healing Baham and great manhers have coluntarity given Certificates of the healing received in Consumptive Compliants of long standing, even where their cases were almost kapeleas, and where they had been given up by their physicians as meanable. A reference to the Certificates accompanying each Bottle given by those of respectability, will satisfy every uncredicted maind of the wonderful curve performed by this Valuable vicebeine. Thousands have shortened their days by reglecting Conglas when first attacked, which have short each either of the according to the continuous of the continuous continuous and the continuous continuous and the continuous continuous and the continuous continuou

Or the slow mineings of the heetic fire.

The true cause of these compile airt, namely Coughs
and Colds, it a suppression of perspiration. The cold,
the damp, the west weather, or the frequent changes
which take place in the atmosphere, occasion the body
to become affected. In consequence of that, the pures
and outlets of the skin, which in time of health are
always breathing out a fine fluid, become so that up that
the perspirable matter, instead of circulating fixedly
through the system, receils upon the blood, fills the vestels superabundantly, and vitiates its quality. Hence ofteutimes the Cough or Cold, though slight, settles upon
the lungs, then terminates in Habitual Cough, or confined sixtum, or inflammation of the Lungs, or in the
calimitous disorder of a Consumption.
